 - 3 . To participate in the final exam , students must submit to the Rector by 30 November of the third year a special instance and by January 31 for a paper copy of computer support three of the final thesis in .Pdf format .
 - 4 . The PhD thesis , accompanied by a summary in Italian and English, is written in Italian or English or in another language prior approval of the Academic Board . The thesis , to which is attached a report on the activities of the student in the course of the PhD and publications, if any , shall be assessed by at least two highly qualified teachers , including those belonging to foreign institutions in the cases under art. 15 of the Rules of University's doctoral research , external to the parties that contributed to the release of the title of PhD , hereinafter referred to as evaluators .
 - 5 . Evaluators make a judgment on the analytical writing thesis and propose the admission to public discussion or referral for a period not exceeding six months if deemed necessary significant additions or corrections. After this period , the argument is in any case admitted to public discussion , accompanied by a written opinion of such new evaluators , made in the light of the corrections or additions may be made.
 - 6 . The public discussion takes place before a Commission whose composition is defined by art. 22 of the Regulations, within the six months immediately following the expiry date of the PhD course . At the end of the discussion , the thesis , with reasoned written judgment collegial , it is approved or rejected. The Commission , by unanimous vote , has the right to assign praise in the presence of the results of particular scientific importance . The title of Doctor of Philosophy is conferred by the Rector and upon successful completion of the final exam .
 - 7 . In the doctoral dissertation, students beneficiary of fellowship funds on POR Calabria FSE 2007/2013 will put the logo of the Regione Calabria , the Repubblica Italiana and the European Union, making explicit reference to the contribution of the European Social Fund.
- The University will deposit the digital copy of the thesis in the database and the next ministerial sending the National Libraries of Rome and Florence.
- The original parchment will be issued by the Università degli Studi Mediterranea di Reggio Calabria, in a single copy , at the request of the person concerned .

Art. 10 - Treatment of personal data

The Università degli Studi Mediterranea di Reggio Calabria in the accomplishment of Decree n° 196/2003 "Code concerning the protection of personal data", agrees to use the personal data supplied by the candidate to carry out the procedures and for institutional purposes. Participation in the competition implies the principles set out in Law concerning tacit consent to the publication of the personal data of candidates on the website of the Università degli Studi Mediterranea di Reggio Calabria.

Art. 11 - Advertising

For matters not covered in this announcement, please refer to the laws and regulations governing Research and PhD.

This notice will be published on the website of the Università degli Studi Mediterranea di Reggio Calabria (http://www.unirc.it/ricerca/scuola_dottorato.php) in the area dedicated to the PhD School, on the corporate website of the European Union EURAXESS (<http://ec.europa.eu/euraxess>) and on the website of the Ministry (<https://ateneo.cineca.it/bandi/>).

It will also be published in the Gazzetta Ufficiale of the Repubblica Italiana .

Exam schedule	written test: october 27, 2015 at 9,00 a.m. - Department dArTe, oral test and test of language: october 28, 2015 at 9,00 a.m. - Department dArTe
Language	English
Required degree	Degree or Master's Degree
Additional requisites	All degrees, specialist and equivalent for foreigners, allow the admission formally. The provenance from degree courses of the class "Architecture and Civil Engineering" allows a total overlap between the minimum knowledge required and the educational objectives of the PhD program.
Educational objectives	<p>PhD programme in Architecture and Environment, according with the art. 1, co. 3, DM n. 45/2013, is a didactic and research course. The main objectives are to train students to the high quality research activities that are important for the public and private institutions, as well as to provide them with skills in professional life, contributing to the realization of the European Space of Higher Education and the European Research Area.</p> <p>In this sense, the course will aim to provide the tools and the knowledge to handle the major issues that today the contemporary, modern and historical architecture puts to the project and to its construction, in the several dimensional scales (region, landscape, city, building)</p> <p>the contributions of the different scientific areas present in the project will be integrated into a complex vision and the educational paths that combine the most innovative research with the territory and the Italian and European cities.</p> <p>They also tend to develop focus and ability to control operating on the issues of sustainability, energy efficiency, static safety, restoration and regeneration with current questions of knowledge and advanced representation of the heritage.</p> <p>It is not expected in a joint curricula.</p>
Expected career and professional opportunities	<p>The PHD program promotes two different training strategies:</p> <ul style="list-style-type: none"> - to provide expertise in the SSD to work both within the university that of the Italian research organizations and foreign research; - to train researchers with strategic skills specific to the needs of the territory, with salable skills even outside the university. <p>Specifically in the second strategy, the training offer focuses on the innovation than the tradition, both in the public and private sphere.</p> <p>In the public sphere, the PhD graduates will be able to work at institutions and agencies involved in the governance of the city and the territory at different levels: design, regional and urban planning, energy, environmental sustainability, and urban construction, environmental protection and mass safety in the territories, the static safety.</p> <p>In the private sphere, the PhD graduates could find work in the technical professional world and in the business activities related to the design and construction of civil engineering and architecture; they can commend the skills acquired in dealing with problems through an interdisciplinary approach, using</p>

objectives	basic scientific areas. The research topics are aimed at deepening economic and legal knowledge, even using the method comparative studies and in view of European harmonization, with reference to legal systems, the theory and practice of the legal regulation of business and work. The dual approach of the analysis - juridical and economic - allows to create an effective interdisciplinary in teaching and research. In this regard, there is a tradition at the international level, especially in common law countries, in the economic analysis of law (Economic Analysis of Law), which constitutes one of the bases of the training course for the acquisition of technical and scientific skills, in order to ensure a vision of the economic phenomenon in its entirety with reference to the same rules that govern the production of "the market" and not as a pure mechanism.
Expected career and professional opportunities	the PhD intends to launch graduates in scientific research, as a fundamental moment for the subsequent teaching and research activities, to form managers in the public sector or in private enterprise. It integrates with the master for public administrations organized by the Department.

	<p>Environmental and Safety Engineering to train high specialization professionals able to deal with complex research or applied issues.</p> <p>Due to the topics interdisciplinary, the Ph.D. involves training, with general and specialized courses, aimed at the transfer of basic knowledge of each subject area during the 1st year, and the development of a specific research topic, which will be the subject of the Ph.D. thesis, during the 2nd and 3rd year.</p> <p>The training will be complemented by practical experience in the laboratories of the Departments, where there are skills, staff and equipment capable of supporting a doctorate and research periods abroad at universities and research centers.</p>
<p>Expected career and professional opportunities</p>	<p>The objective of the Ph.D. is to provide competencies for a successful employment in the job or research market by contributing to the competitiveness increase of the area pertaining to the program.</p> <p>The training course "Civil Engineering" provides employment opportunities in the field of geotechnical, hydraulic and structural engineering and of civil infrastructure through training specialists in design, planning, management, control and monitoring. The reference areas of employment are public authorities and the world of engineering technicians.</p> <p>The training course "Environmental Engineering" provides employment opportunities in the field of environmental engineering and contributes to the training of experts in the design, management and control of works and sustainable infrastructure systems and of materials with low environmental impact, systems for the control, protection and management of the land to monitor and mitigate risks.</p> <p>The training course "Safety Engineering" provides employment opportunities in the field of materials, energy, monitoring and control through training specialists in the study of innovative materials, production of energy from renewable sources and with a low-impact, planning and management of complex systems and networks and design and management of networks for environmental monitoring.</p>

The identity of the candidate will be also verified later upon successful completion of competition. The candidate who intends to use this mode should be indicated in the application for participation. The skype connection is “URED PhD Programme”</p>
Admission timetable	<p>1. 27 October 2015 Qualification Evaluation 9.00 am local time</p> <p>The ranking list of the qualifications evaluation results will be published on the following links: http://www.unirc.it/ricerca/scuola_dottorato.php. and http://www.cluds-7fp.unirc.it/index.php <u>The publication on the links listed above is the exclusive way to officially announce the ranking list and the admission to the interview, there will be no other forms of announcement</u></p> <p>2. 28 October 2015 Interview 9.00 am local time – PAU Department.</p>
Language	English
Educational Qualification required	Masters degree at the date of the application.
Further requirements	TOEFL with a score of 79-80 is required. The candidate who has not this certification must commit himself to acquire it within the first year of attendance.
Training Objectives	<p>The Doctoral Programme “Urban Regeneration and Economic Development” (URED Doctoral Programme) is an initiative promoted by an international research network created during the implementation of a research project grant by the Seventh Framework Programme Marie Curie IRSES 2010, entitled “CLUDs Commercial Local Urban Districts”. The URED Doctoral Programme has been activated thanks to the financial support of the Regional Operational Programme Calabria 2007/2013 Axis V - Operational Objective N.4.</p> <p>The CLUDs Project aims at exploring new approaches in urban regeneration policy in order to strengthen the public private partnerships (PPP) also based on urban-rural linkages.</p>

Unione Europea

Regione Calabria

Repubblica Italiana

Università degli Studi
Mediterranea
di Reggio Calabria

The URED Doctoral Programme has the training objectives of improving the knowledge and the skill on: different forms of PPP implemented through urban regeneration initiatives, local economic development also with respect the urban-rural linkages, the economic, financial social and environmental feasibility of urban and territorial transformation based on community-led and local placed approach, the social, economic and environmental sustainability takes into account also the issues related to the built environment with respect the structural analysis for urban security and safety.

The URED Doctoral Programme has a leading position at international level, as it is based on an innovative multidisciplinary approach allowing the integration of economic disciplines with urban issues to support economic development of territories in relation to local needs.

The emphasis on the public private partnerships, on the community led approach and the urban-rural connections reflects the orientation of the future Cohesion Policy to the Europe 2020 agenda defining areas of research consistent with the Horizon 2020. In addition, the strong interconnection between Europe and the United States represents an added value in the context of future lines of research of Horizon 2020 in which bilateral EU-US projects are widely supported.

The Educational Programme is structured as follows:

4. First Year: Five main courses at Università Mediterranea of Reggio Calabria;
 - Introduction to Urban Policy and Economic Development (Main Course-Coord. Prof. Carmelina Bevilacqua Università Reggio Calabria) – 60 hours.
