| <b>Context of the research activity</b>  |   |
| Motivations and objectives of the research in this field                         | The PhD course is aimed at exploring the significance and impact of urban changes, with specific attention to the transition towards new more sustainable and equal modes of urban development, as well as to pro-active innovation in planning practices, which expand traditional urban studies, urban design and policy approaches.<br>The integration between different spheres of research, theory and practice as well as innovative planning practices that combine urban design and policy design are promoting as an approach of the research projects involved in the PhD program.<br><br><a href="http://www.dastu.polimi.it/index.php?id=1146">http://www.dastu.polimi.it/index.php?id=1146</a> |
| Methods and techniques that will be developed and used to carry out the research | The approach of the PhD Program is inter-disciplinary: the PHD research projects will be supported by introductory courses, focused on methodological aspects and core themes, comparative assessment of best practices and design workshops.   |
| Educational objectives   | The program aims at providing analytical and interpretative tools, as well as research/planning/design methodologies, able to produce further advancement in urban studies, spatial and land use planning, urban design, urban policies and governance, establishing a dialogue with the experiences of the best European and International PhD programmes.<br><br><a href="http://www.dastu.polimi.it/index.php?id=1146">http://www.dastu.polimi.it/index.php?id=1146</a>  |
| Job opportunities  | Having an international orientation, the Programme is aimed to train and prepare highly qualified researchers and professionals to work in academic institutions, research centres, public administrations and the private sector   |
